Assistant Manager Project Management

SMR is one of the largest manufacturers of rearview mirrors for passenger vehicles in the world. Furthermore, the company is a pioneer in developing intelligent camera technologies for automotive applications.

Our goal is to actively help forming the future of the automotive industry – with innovative technologies that make driving more comfortable and safer.

This role will be responsible for leading the Product Development using standard APQP process and leading the CFT team single handedly. Additionally be responsible for Global Design coordinator for Studio.

What you'll do

- Acting as a window person for new enquiries and for development phase of ORVMs & IRVMs for MSIL, Mahindra, Honda & Tata
- Assessing the customer RFQ/SOR and leading the design team for concept creation.
- Leading the technical reviews meeting with customers along with design team and presenting product feasibility studies.
- Floating the RFQs to suppliers and compiling the quotes for marketing team's reference.
- Kicking-off the project along with CFT and preparing the detailed project timeline according to the customer's milestone.
- Leading the APQP process for all New Product Development parts.
- Interacting with CFT, customer engineering, purchase and SQE team on daily basis for project tracking.
- Co-ordination with internal and external testing agency for DV testing.
- Preparation of Project presentation for Management and highlighting potential risk and discussing mitigation plan.
- Sourcing new suppliers and interaction with existing suppliers for RM and BOP development.
- Coordination in PFMEA, DFMEA, Control plan, Process flow, Risk analysis.
- Coordination with Studio design team and coordinate with global team for design completion and cost controlling

What we are looking for

- B. Tech (Mechanical) with 8-10 years of post-qualification experience in Automotive industry or
- Diploma (Mechanical) with 11-12 years of post-qualification experience in Automotive industry
- Proficiency in MS Projects/Excel for scheduling
- Should have the capability of reading the product drawing as per the customer requirement/specification
- Good understanding of Tooling concepts like Slider and Lifter feasibility study
- Good grip on IATF APQP process
- Excellent communication skills
