

Experienced

Deputy Manager Supplier Technical Assistance-IND

Gujarat, India

Experienced Deputy Manager – Quality with a strong background in **Supplier technical assistance** within the automotive sector. Skilled in supplier audits, root cause analysis, and implementation of corrective actions to ensure compliance with quality standards. Proven ability to drive supplier performance, reduce defects, and support continuous improvement initiatives. Committed to maintaining robust quality systems and fostering long-term, value-driven supplier partnerships.

What you'll do

• Task Description – Supplier Technical Assistance (Deputy Manager – Quality)

As a Deputy Manager – Quality, You Are responsible for managing and supporting suppliers to ensure consistent delivery of quality parts and components in line with organizational standards. Your role focuses on supplier development, performance monitoring, and problem resolution to maintain a stable supply chain.

- Lead supplier audits and process capability evaluations.
- Implement and monitor APQP, PPAP, and control plans at supplier end.
- Address quality issues through structured problem-solving tools (8D, Why-Why analysis, Fishbone).
- Drive implementation of corrective and preventive actions to eliminate recurring defects.
- Monitor supplier KPIs such as PPM, on-time delivery, and quality cost.
- Conduct regular reviews and follow-ups to ensure continuous improvement.
- Collaborate with cross-functional teams and suppliers during new product development and change management.
- Ensure compliance with IATF 16949, customer-specific requirements, and safety standards.
- Train and guide suppliers on quality systems and best practices.

What we are looking for

• Profile Description

Experienced and results-driven Deputy Manager – Quality with over 10 years in the automotive manufacturing industry, specializing in Supplier Technical Assistance. Proven expertise in supplier quality management, process audits, and implementing robust quality systems in alignment with IATF 16949 and OEM requirements. Skilled in APQP, PPAP, and structured problem-solving methodologies such as 8D, Fishbone, and 5 Why. Adept at improving supplier performance, reducing defects, and ensuring timely delivery of quality components. Strong communicator and collaborator, capable of building effective supplier relationships and leading cross-functional teams to resolve technical issues. Committed to driving continuous improvement, cost reduction, and operational excellence across the supply chain.
